(TLP:WHITE)

Greetings state, local, tribal, and territorial partners,

CISA has released a GitHub [Log4j Scanner](#). This repository provides a scanning solution for the Log4j Remote Code Execution vulnerabilities (CVE-2021-44228 & CVE-2021-45046). The Log4j scanner is derived from other members of the open-source community by CISA to help organizations identify potentially vulnerable web services affected by the Log4j vulnerabilities.

CISA Recommendations:

- Review the GitHub site

We kindly request any incidents related to this product be reported to CISA at https://us-cert.cisa.gov/report, Central@cisa.dhs.gov, or 888-282-0870.

The information and code in this repository is provided "as is" and was assembled with the help of the open-source community and updated by CISA through collaboration with the broader cybersecurity community.

CISA does not endorse any commercial product or service, including any subjects of analysis. Any reference to specific commercial products, processes, or services by service mark, trademark, manufacturer, or otherwise, does not constitute or imply their endorsement, recommendation, or favoring by CISA.

V/R,
