

EIS CYBER SECURITY WEBINAR SERIES

Work From Anywhere

Please join us on Thursday, July 28th for our next EIS web series event "Work from Anywhere". We have assembled a great panel of Cybersecurity experts to discuss this ongoing evolution of work, its impact and opportunities, and how organizations of all shapes and sizes are adapting to the "new normal" of work to optimize operations to deliver a great client and staff experience.

You will learn:

- What is the current state of Work From Anywhere?
- In addition to Cybersecurity what other business units are involved?
- One size does not fit all.
- Where do I start?
- Is there a Standard that I should consider?

This session will focus on addressing business challenges and not specific technology pieces and parts, we look forward to a very interactive discussion.

Visit the EIS Cyber Security Webinar webpage at:
