

EIS CYBER SECURITY WEBINAR SERIES

SASE

Please join us on September 14th at 1pm to participate our next webinar on Secure access service edge (SASE) presented by Gartner. *Please plan on attending as this webinar will not be recorded.*

SASE delivers multiple converged network and security as a service capabilities, such as SD-WAN, SWG, CASB, NGFW and zero trust network access (ZTNA). SASE supports branch office, remote worker and on-premises general internet security use cases. SASE is delivered as a service and enables zero trust access based on the identity of the device or entity, combined with real-time context and security and compliance policies. *But what does this really mean for your network and users?* We will discuss the following topics to clear the noise and help you distill the benefits:

- What is SASE and why should I care?
- Single Vendor SASE vs. Multivendor SASE?
- Who are the SASE vendors (and pretenders)?
- What is the relationship between SASE, SSE and SDWAN?

Visit the EIS Cyber Security Webinar webpage at:

THE MEETING](#)

**WHO SHOULD
ATTEND:
BUSINESS DECISION
MAKERS, CYBER
SECURITY AND IT
PERSONNEL**

FUTURE WEBINARS INCLUDE

-  Zero Trust
November 16th – 1-2:30pm
-  Supply Chain Risks
February 16th – 1-2:30pm
-  Cloud Security
April 13th – 1-2:30pm
-  Security Roadmaps
June 15th – 1-2:30pm
-  Data Privacy
August 17th – 1-2:30pm
-  Approach to Social Engineering
October 19th – 1-2:30pm
