CSET
CYBER SECURITY EVALUATION TOOL

What's **NEW** in CSET?

New CSET Version 11.5

New enhancements of 11.5 over previous 11.2

01 NEW ASSESSMENTS
are integrated into CSET, to include several of which are sponsored by CISA.

CPG	Cyber Performance Goals
MVRA	Minimum Viable Resilience Assessment
405D	Healthcare-Cyber Related Assessment
LMRA	Land Mobile Radio Assessments *(All Emergency Communications Systems Cyber Assessment)*
CMMC 2.0	Draft w/Score Card

02 IMPORT AND EXPORT
of assessment data via JSON is easier to find and execute.

03 UPDATED AND IMPROVED UI
(we call it Gallery View)

- Easier to navigate
- Intuitive
- Simplified yet organized

IN USE by Various Stakeholders

- **IT & OT**
- **SCADA**
- **SUPPLY CHAIN**
- **HEALTHCARE** *and more...*

KEY BENEFITS...

- Provides a systematic, disciplined, and repeatable method for assessing infrastructure;

- Provides priority list based on assessment input, with recommendations on how to mitigate based on best practices by cybersecurity experts;

- Ability to compare to baseline, or two separate assessments;

- Integrated module builder, which allows for the creation of your own custom assessment depending on selected standard;

- Provides a plain-language explanation and references for each of the declarative statements included in the assessment;

- Includes professionally designed reports and provides tear-out-sheets to address identified issues based upon the results of the assessment;

- Generate a network diagram from scratch or use a pre-built template diagram;

- Saves significant time and money due to reference material being locally integrated into CSET.

CSET is FREE for all Critical Infrastructure Stakeholders.
