

YOUR IDEAS NEEDED!

The Community Health Assessment Design Team (CHADT) has compiled a lot of data to assess the state of health and equity in Lane County. The next step is for the community to look at the data and help us identify themes to help inform the priorities in the next Community Health Improvement Plan.

Starting in April, the CHADT will be sharing the data and facilitating conversations with communities across the county. **We are looking for partners to help us convene these conversations.**

How you can help:

- Recruit community members to attend events
 - We are looking to host groups of 10-30 people
- Organize a time and place
 - We'll need 2-3 hours and enough space to move around and have small-group conversations
- Come discuss the data with us!

We'll provide tools and discussion questions for looking at the data and identifying themes at the event. We can also provide stipends for participants and food at the event.

The data we'll be sharing can be found on our [website](#) (some is still being analyzed, but it will be up as soon as possible!)
