

Oregon Family to Family Health Information Center & The Institute on Development and Disability

Why did my child do that?!

Understanding behavior one step at a time

For families of children with developmental differences ages 4-14

Do you ever wonder why your child melts down, shuts down, or pushes back?
Join child psychologists Rachel Greene, PhD and Tara Rutter, PhD for a practical talk for parents of children with developmental differences. There will be time to ask questions and connect with other caregivers as well.

You'll learn:

- ✓ What the **ABCs of behavior** are (and why they matter)
- ✓ Common **reasons kids have big behaviors**—and what they're really trying to say
- ✓ **Simple, real-life tools** to support your child while reducing meltdowns and power struggles
