The Office of Multicultural Health and Services has been advancing health equity and diversity initiatives, policy recommendations and capacity building within the Oregon Health Authority and in the community. Nearly 400 of you participated in our strategic planning process – now we would like to share the final result. Join us to hear about our shared accomplishments and network with each other.

We will also honor the people who have contributed significant time and talents to guide our work. Come celebrate, share and help us build health equity and diversity in Oregon.

Accommodations are available to ensure people with disabilities can participate. Please give as much advance notice as possible by calling Alexis Asihene, 971-673-1283.
