## Questions?

Contact the National Center for Fatality Review and Prevention: 800-656-2434, [info@ncfrp.org](mailto:info@ncfrp.org). A limit of 500 attendees is permitted. Webinars are archived and posted on our website:

<https://www.ncfrp.org>

For sleep-related SUIDs, determining through CDR if child maltreatment contributed to the death is complex and often inconsistent. This webinar will discuss guidelines that were developed to help CDR teams more consistently and equitably classify child maltreatment for sleep-related SUIDs. CDR coordinators and team members are the key audience for this webinar.

# Speaker Biographies

## *Sasha Mintz, MPH*

Sasha is a Senior Epidemiologist for the National Center for Fatality Review and Prevention. Her work focuses on providing epidemiological support to users of the National Fatality Review-Case Reporting System and disseminating data using an equity lens. In her 8 years working in mortality surveillance and review, she has worked at both the state and national levels, including with the Colorado Violent Death Reporting System and the Colorado Child Fatality Prevention System. She received a bachelor's in biomedical sciences in 2012 from Colorado State University and a master's in public health in 2017 from the University of Colorado.

## *Patti Schnitzer, PhD*

Patti is a Data Systems Consultant to the National Center. She leads the data quality initiative and provides epidemiology support to National Center staff. She has a PhD in epidemiology and has worked with child death review programs and data for the past 25 years. Her research interests are in the epidemiology and prevention of childhood injuries, including injuries related to child abuse or neglect.

## *Esther Shaw, MSIS*

Esther is a Senior Data Analyst and has been at the National Center over a dozen years, providing data support to Child Death Review teams and Fetal and Infant Mortality Review teams across the U.S. Other work focuses on upgrades to the online data entry site, maintaining the CNPI website and assisting with the data quality initiatives. Ms. Shaw's education started in social work but after getting bitten by the computer bug, she went back to school for a degree in Information Science. She feels her job is a great fit for both.
