

The Sudden Unexpected Infant Death (SUID) Prevention Program Free Webinar!

Partnering for Prevention: Evaluating and Decision Making

Tuesday, June 10, 2025

8:00 - 9:00am PDT | 9:00 - 10:00am MDT | 10:00 - 11:00pm CDT | 11:00 - 12:00pm EDT

This upcoming webinar will highlight the role and importance that both evaluation and assessment have in program success, specifically related towards Sudden Unexpected Infant Death (SUID) prevention. It will discuss various evaluation strategies and will look at how risk perception influences family decision-making in SUID-prevention. This webinar will be going through the reasoning behind why we should evaluate programs, how to narrow down on the problem through root cause analysis, breaking down barriers to change, then diving into different intervention types to find solutions. We will provide a walkthrough of specific examples of interventions used to intervene risk factors that can lead to SUID-related deaths and discuss various data trends related to SUID.

Learning Objectives & Faculty Speakers

- Recognize the importance of evaluation and assessment in programs
- Evaluate evaluation strategies that will best look for the desired changes
- Discuss how risk perception influences family decision-making

Rachel Y. Moon, MD, FAAP

Harrison Distinguished Teaching Professor of Pediatrics
University of Virginia School of Medicine

Kyran Quinlan, MD, MPH, FAAP

Public Health Advisor
Cook County SUID Case Registry and Prevention
Community Partnership Approaches to Safe Sleep- CPASS Chicago
