Improving Consistency of Child Maltreatment Identification for Drowning

Thursday, December 11, 2025

2:00 pm-3:00 pm, EST

For every death reviewed and entered into the Pediatric National Fatality Review-Case Reporting System (Pediatric NFR-CRS), child death review (CDR) teams are asked to consider if child maltreatment played a role in the death (Section I5). In this webinar, guidelines to help CDR teams more consistently and objectively classify child maltreatment for drowning deaths are highlighted. Incident circumstances, subjectivity reductions, and the role of personal assumptions and judgment will be discussed.
