

2018 Framework Use Case Survey

The Oregon Geospatial Enterprise Office wants to highlight your use case for Framework and/or other GIS data. Use cases will be communicated to Legislators and other leaders across the state to convey advantages and benefits achieved by having access to authoritative, reliable data *when* and *where* it is needed as well as the geospatial data and capabilities to apply them.

Use cases may include situations in which geospatial data and capabilities are or were:

- Available and facilitated a successful outcome
- Not available but having them would result in better outcomes.

Example situations include those where geospatial data improved services, business processes, and outcomes or would have been beneficial if they had been available. If you would like to contribute, please fill out this template and return it by email to [Theresa Burcsu](mailto:Theresa.Burcsu@oregon.gov) with the subject "GIS use case".

The suggested components for the use case are the situation, obstacles, actions, and results. See directly below for more information about each component.

Situation

In what situation were GIS data and/or analysis needed?

Obstacles

What obstacles stood in the way (that geospatial data helped to resolve)?

Actions

What actions were or could be taken with GIS and/or geospatial data?

Results

What results were achieved or desired?

Contact Information

Full Name: _____ *Date:* _____
Last First

Organization: _____

Phone: _____ *Email* _____

Using the space below, insert the elements of your use case. Use case elements are described above, in the blue box.

Situation

In what situation were GIS data and/or analysis needed?

Obstacles

What obstacles stood in the way (that geospatial data helped to resolve)?

Actions

What actions were or could be taken with GIS and/or geospatial data?

Results

What results were achieved or desired?
