

2nd LiDAR Symposium — 2nd Call for presentations

Abstracts must be received by 5 pm, August 12, 2019

We invite your submission for a 20-30 minute presentation about your work with LiDAR.

Airborne laser scanning – Stories from the field about innovative uses or novel applications of airborne LiDAR.

New LiDAR products and services – Public or private developers showcase new LiDAR products or services.

LiDAR and drones – Unmanned aircraft systems with LiDAR imaging capability are redefining the limits of remote sensing.

Workflows, apps, and data management – Tools, apps, software, work-arounds; best practices for acquiring or working with LiDAR data.

Emerging LiDAR technologies – Applications of new LiDAR products and capabilities.

To submit a proposal send an abstract (about 200 words) by email to john.bragg@state.or.us. Include “LiDAR Symposium” in the subject line. Authors may submit more than one proposal. Each proposal should be submitted separately and include:

Presentation title.

Type of presentation (Regular or lightning)

Author’s first and last name, organization, county, ZIP code, phone number, and email address.

Theme(s) your presentation will address.

A short professional CV.

Fast As Lightning!

This year the Symposium By the Sea will include a lightning round session. Lightning presentations are short (7 minutes max.)

You may propose a regular presentation, a lightning presentation, or both.

Indicate, for each proposal submitted, which type you want to make.

Abstracts must be received by 5 pm, August 12, 2019.

Sponsored by the South Coast GIS Users Group
and the South Slough National Estuarine Research Reserve.
