GPL Agenda for October 11, 2011
Mission to serve as a forum for public agencies in Oregon to coordinate development of Geographic Information Systems and to provide the Oregon Geographic Information Council with technical advice.

Time: 1:30 PM to 3:30 PM
Location: OMD Emergency Management
            3225 State Street
            Salem, OR

Room: Unknown at this time
Host: Gillien Duvall

Ilinc info:

Join: https://oregon.ilinc.com/join/jjszhph
Teleconference number: 1-719-457-0613
Participant Code: 736587

Send your agency reports to Diana Walker before the meeting or by October 19, 2011.

Agenda:
Introductions/Reminders
        NW GIS User Group Oct 17-21 – Boise ID
        GIS Day November 16th
Any items to add to agenda
Approval of meeting notes for September and July
Meeting for the next 3 months
        November 8
                Demo on data.oregon.gov
        December 13
        January 10

1. Demo from Amy Esnard on Venom
2. GIS Day – Are we doing anything?
3. Updating GIS Program Leader Committee list on web with phone and email?
4. Agency Reports – continue sending to chair or just post at a set location on GovSpace
5. Talk about the below statement:
Comments from GPL:
On page 5 of the "OGIC MOA final" the following is in the document:
Coordinate with OGIC and specifically its technical advisory committee, the GIS Program Leaders (GPL) , on geospatial mapping projects and geospatial application development, regardless of the platform (web, desktop, mobile, server, etc.) to ensure that new mapping projects and applications take full advantage of existing mapping projects and applications to eliminate or reduce redundant effort and expense. GPL will facilitate this coordination by creating a web-based interactive database of geospatial projects and applications.
Ideas on what GPL will be creating for the "web-based interactive database of geospatial projects and applications"

To add to the item below about the OGIC MOA, there's also an item in the OGIC Strategic Plan, as follows:

Objective S1.1: A compendium of available public services and resources for geographic information development and GIS application development will be compiled and maintained.

Objective S1.2: An on-line, interactive database of GIS projects and applications of geographic information will be developed and kept up-to-date.

http://gis.oregon.gov/DAS/EISPD/GEO/ogic/docs/2010FinalGISPlan_091510.pdf

Table 4.1 in the Strategic Plan indicates that other groups beyond GPL have responsibilities for these items, so collaborative action is contemplated.
