# GPL Meeting Notes for April10, 2012

**Present:** Malavika Bishop, DEQ; Gail Ewart, DLCL; Rachel Lyles, DOGMAI; Dan Antonson, DSL; Milt Hill, DAS GEO; Diana Walker, ODA; Emmor Nile, ODF; Brady Callahan, OPRD; Ashley Seim, OWEB; Bob Harmon, OWRD; Sim Ogle, Port of Portland; Amy Esnard, OEM
Missed getting all of the folks on the phone.

Announcements
       NW GIS User Conference Sept 30 to Oct 4th in Portland, OR
       Next OGIC meeting June 20th
       North American Cartographic Information Society (NACIS) October 17-19, in Portland
       WhereCampPDX (volunteer-created un-conference), October 19th-21st, in Portland

Meeting for the next 3 months
       June 12th – NMOB Room 124A – Demo from DSL by Dan Antonson (State Land Inventory)
              Topics (heads ups folks)
                     Data.Oregon.gov – So can report to OGIC June 20th
                     Web-base geospatial project
              July 10th – Port of Portland, Sim

Both demos had technical issues so the presenters modified the presentation somewhat.
Demo on AGO – ODA's Smoke Program App – Diana Walker

Demo on Raptor – Amy Esnard – OEM (30 Minutes)

Metadata standard and data management procedures:
       North American Profile has been endorsed

Idea/topics for future ESRI – State User Group Meetings
          Two ideas:
          Demo Web apps seen at GPL this calendar year
          Presentation from John Sharrard on "what's new in server 10.1"

**ESRI Cloud hosting solution:**
       Any updates? People recall that this was mired in negotiations. Is this still the case?
       Negotiations have concluded and the agreement is being routed for signatures first at ESRI then here.
       As soon as it's executed we'll begin shipping imagery to them for processing. David M the lead on this

**WSCA Cloud services RFP:**
       Diana recall that Cy stated that this "should be signed in a few weeks". What's the current status?
Four vendors have been selected and their offered services are being tested at this time. If testing results are positive then price negotiations will begin. Ultimately, this will result in a cooperative purchase contract available to any governmental entity in the US.

**ELA training:**
ESRI interviewed agencies but no one has heard anything since then. Do we know what might be happening?
We anticipate that Martha from ESRI will be on the agenda at the May GPL meeting to discuss their findings and the next steps. Oregon is the first ELA that ESRI has done this with and it's taking a little longer than expected.  Erik is the lead on this

Subcommittee reports if any
       Data.oregon.gov (Bob H., Chris B., Don P., Erik E.)
       Web-base geospatial projects (Randy D., Erik E., Tanya H., Diana W.)

Need to report status to OGIC in June of the two above mentioned subcommittees.
