

## NAVIGATOR COMPREHENSIVE EVALUATION

# FRAMEWORK DATA ELEMENTS

## GPL PARTICIPATION IN THE DEVELOPMENT OF THE 2018 FRAMEWORK DATA INVENTORY AND ASSESSMENT

**This document describes the desired approach for evaluation of the Framework Data Inventory and Assessment by the GIS Program Leads. This is the same approach being used by the FIT Leads.**

As a member of the GIS Program Leaders, your feedback is very important. Please review and/or comment on the following materials to help GEO develop a high quality evaluation instrument for Oregon's Framework data elements.

### Actions requested:

1. **Review** the [navigatOR Comprehensive Evaluation Preliminary Scope](#) for context (link leads to Google docs). This will provide you with an overview of the evaluation process that GEO will be embarking on to support OGIC and its planned activities.
2. **Review** the [Oregon Framework evaluation methods proposal](#) (link to Google doc). This document provides more detail about the data inventory and assessment methods and process.
3. **Review** and **comment** on the [Oregon Framework Proposed Survey Questions](#) (link leads to Google sheet)
4. **Review** and **comment** on the [Oregon Framework Proposed Response Sets](#) (link leads to Google doc)
5. **Complete your reviews by December 15, 2017**

After you and the FIT leads have reviewed the proposed evaluation materials, the questions and responses will be finalized and transferred to an online survey that will be available for FIT themes to use beginning in January 2018.

The actual evaluation of individual Framework data elements can be done using a variety of methods. For example, individuals or small groups within the FIT themes could be identified to evaluate each data element, but the evaluation could be done in other ways too. *FIT themes should determine the approach that works best for their participants and data elements. All data element evaluations will be coordinated within FIT themes.*

The Framework Coordinator will hold a weekly series of very short "huddles" or "stand-ups" to discuss evaluation topics over the next several months to ensure that we are all on the same page. GPL members can attend them as they fit schedules or need. The first is scheduled for Thursday, December 7 at 8:30 AM. All huddles will be held via Zoom (<https://zoom.us/j/707401368>).

**Questions?** Please contact:
