

Pollution in People,

presented by Jennifer Coleman

When?

November 28th from 12:00-1:00pm, Cascade Campus MAHB room 104

What?

Pollution in people: The toxic risks of everyday products include Asthma, Diabetes, Heart Disease, and some Cancers--many chronic disease rates are on the rise, even in children. What role does our environment play? Find out what we know--and don't know--about toxins in our environment.

Who?

Oregon Environmental Council is a nonprofit advocacy organization advancing innovative, collaborative solutions to today's environmental challenges. Jen Coleman is their outreach director.

Why do we care?

"As more and more chemicals are found in our bodies and the environment...

many are turning to government for assurance that...unacceptable risks haven't been ignored. Right now, we are failing to get this job done."

-- Lisa P Jackson, EPA Administrator, 2009
