

# *Introduction to* **POPULAR EDUCATION**

**Presented by the Community Capacitation Center**

Popular education is a highly effective strategy for building knowledge and skills, developing leadership, and organizing for social justice. Most closely associated with the adult literacy work of Brazilian Paulo Freire, popular education is used around the world in many fields. It is applicable to all areas of educational practice. Popular education is based on the idea that, no matter our occupation and level of formal education, we all know a great deal as a result of our life experience. Therefore educators should start with what people already know and build on it.
