2014 Health Impact Assessment Training

A Framework for Considering Health in All Policies

8:30am - 4:30pm

• June 24, 2014

• Salem, OR

A full day health impact assessment workshop designed for practitioners and consultants who work in planning, evaluation, assessment, or health promotion. This training was developed with support from a grant from the Health Impact Project, a collaboration of the Robert Wood Johnson Foundation and The Pew Charitable Trusts.

The primary goals of this workshop are to:

- Increase multi-sectoral understanding of HIA rationale and process
- Increase multi-sectoral understanding of key public health concepts and social determinants of health
- Help participants understand when an HIA is appropriate and other tools to integrate health analyses into existing projects
- Strengthen relationships between organizations interested in integrating public health considerations into their work
- Understand how HIA is used in the field

Location: Keizer Heritage Center
980 Chemawa Rd NE, Keizer, OR 97303

UPDATED Cost: \$115 general rate; \$100 for OAPA, WTS, and OPHA members; \$85 for 501c-3 non profits; student and scholarship seats full - please email Samantha@upstreampublichealth.org to be on wait list

CM Credits: 6.5 AICP credits available, pending approval

CHES CE Credits: pending approval

Workshop Agenda & Registration Info available at www.UpstreamPublicHealth.org

Questions? Contact Research Manager Tia Henderson at tia@upstreampublichealth.org or 503-284-6390

About Upstream Public Health and the Oregon Public Health Institute

Upstream and OPHI are 501(c) 3 non-profit organizations based in Portland, OR. Both organizations have played a role in shaping the HIA field across the country and been involved in numerous HIAs in the transportation, land, housing, energy, and education sectors.

UPSTREAM
PUBLIC HEALTH

Upstream is on the steering committee of the Society of Practitioners of HIA supporting HIA resource development for practitioners. Upstream promotes policies within the public, private, and community sectors for improving health and reducing health disparities. We provide credible and timely information about the connection between upstream solutions, public policy, and public health.

OPHI provides support to organizations conducting HIAs through training and technical assistance. OPHI provides public health expertise for non-public health agencies and organizations, serving as technical reviewers and advisors, stakeholder engagement facilitators, and project managers for a wide variety of policy and planning projects. More information about OPHI's expertise and services can be found at www.orphi.org.
