

Patient-Centered Approach to Comprehensive Services

Applying A Status Neutral Approach to HIV Care and Prevention

Date: February 13, 2024

Time: 10:00 am – 4:00 pm (PST)

Location: In-person & Zoom

Please join us for an engaging one-day workshop, Patient-Centered Approach to Comprehensive Services, *Applying a Status Neutral Approach to HIV Care and Prevention*.

This event will be presented in-person and on Zoom and will explore the status neutral approach; a patient-centered framework for the provision of services that prioritizes high-quality care for everyone, regardless of individual's HIV status. Embracing a status neutral approach helps to reduce stigma and health disparities, fostering access to services. This framework, grounded in a one-door, whole-person approach, not only supports optimal health, but also contributes to ending the HIV epidemic.

Workshop sessions:

- Person Centered Approach to HIV Prevention: presented by SFDPH
- Conversations Around Status Neutral: presented by NYC DOHMH
- Introduction to Anti-Racist Clinical Care: presented by Denver PTC
