

CLIR
**Climate Resiliency
 Action Series**

Session 5

Thursday, March 13, 2025
 12:00 pm – 1:30 pm EST

Place-Based Planning

Culture bearers, stewards, librarians, archivists, and museum professionals play a vital role in preserving history, memory, and culture for local and regional communities. The impacts of climate change make preserving cultural heritage more challenging for the heritage and arts sectors. Assessing risk and long-term effects based on data, as well as cross-sector network building, is critical to strengthening community resilience at both the local and regional levels.

Registration

Dan Hackborn
 Ph.D. Candidate
 University of Alberta

Alessandra Jerolleman
 Assistant Professor, Center on
 Environment, Land, and Law
 Loyola University New Orleans
