WHY ATTEND

As many of you may know, we have been working diligently at NCFRP to get ready for the release of Version 5.0 of the National Fatality Review Case Reporting System (NFR-CRS) on **April 23rd, 2018**. This webinar will focus on the **re-structuring of the current Section I, Acts of Omission/Commission**, to be more user friendly (which will improve the consistency of reporting), and **added new skip patterns**.

SPEAKER BIOGRAPHIES

Guest Speaker: Patricia Schnitzer

Patricia (Patti) Schnitzer, PhD is an epidemiologist with nearly 20 years of experience working with child death review programs and data. She spent 17 years on the faculty at the University of Missouri and is currently a data systems consultant to the National Center for Fatality Review and Prevention, leading their data quality initiative. She is a member of the Boone County (Missouri) Child Fatality Review Panel, and the Missouri Child Fatality Review State Advisory Panel, providing expertise on child abuse and neglect and injury prevention. Her research has examined the role of adult supervision in the risk of unintentional injuries among young children, and currently focuses on the definition and measurement of fatal child maltreatment.

ORGANIZATION DESCRIPTION

Webinar Host Organization: The National Center for Fatality Review & Prevention

The National Center for Fatality Review & Prevention (NCFRP), a program of the Michigan Public Health Institute (MPHI), is funded by the U.S. Health Resources & Services Administration Maternal and Child Health Bureau to provide training, technical assistance, and data services to CDR and FIMR programs around the country. The Center uses on-site and remote consultations, web-based trainings, and an interactive website to support review programs. The Center also develops and disseminates materials. Support focuses on assisting teams to improve their effectiveness in moving from review findings to policy, practice, and prevention improvements. NCFRP also works with numerous national partners to help translate review recommendations into action.
