

ORMAP EDITOR TOOLBAR – Download & Installation (<https://github.com/ORMAPtools>)

ORMAP -Taxlot Editing Toolbar

The ORMAP Data Editing toolbar is a specific set of tools built to support Oregon Counties and the requirements of the Oregon Department of Revenue for mapping tax parcels. The tools are built using the programming language Visual Basic. They are platform as an Add-In and supports version 10.1+ (currently tested up to version 10.5). ArcMap is required to use this toolbar.

Download

The download contains everything you need including the Add-In, documentation, and configuration files.

Documentation/Configuration

This Add-In requires configuration and setup prior to use. This documentation is meant for an administrator who will configure and distribute the Add-In to users.

1. Download the add-in from the link above to a folder on your hard drive.
2. Start by navigating to folder where you downloaded the "OrmapTaxlotEditing" Add-In file and double click the file to install.
3. You should receive confirmation that the toolbar was added successfully.

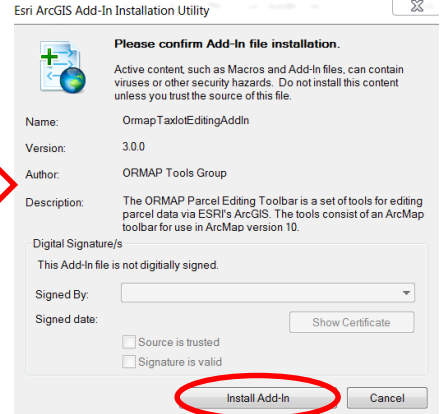

You can now use the ORMAP Taxlot Editing Settings within Arcmap.

1. Verify the new Ormap Taxlot Editing toolbar is turned on. In Arcmap, click Customize >> Toolbars. Scroll through the list and make sure the Ormap Taxlot Editing Toolbar has a check next to it. If it does not click it to turn it on.
2. Hover your mouse over each tool on the toolbar to find the "Set/Edit the ORMAP Settings" tool. Click this tool, and use the "Settings_help.pdf" found in the "Help" folder to configure the Toolbar.
3. Instructions for use of the Tools can be found in the "Help" folder on linked below.

ORMAP Taxlot Editing Toolbar version 3.0

Copyright © 2008 ORMAP Tech Group. All rights reserved.

The ORMAP Taxlot Editing Toolbar gives the user tools to edit taxlots and related features in compliance with the ORMAP standard.

Locate Feature/Definition Query Tool

General Description:

The Locate Tool changes the map extent to the extent of either a MapIndex or Taxlot polygon depending on user input values (a map number or a map number and tax lot). In addition to this the tool provides a way to override the auto-attributing of features based upon the underlying MapIndex and specifically set the MapIndex for all features added or modified.

The Definition Query tool allows you to set and clear definition queries for specified feature classes in the TOC.

Prerequisites:

- Must have the MapIndex and Taxlot polygon feature classes loaded into the active data frame of the current map document.

How to Use:

To Display or Hide the Locate Feature Dialog:

1. Press the Locate Tool on the ORMAP Editing Toolbar.
