The Newest Version of this Successful Program:

¡Cuídate! is a culturally and evidence-based program empowering Latino youth to make informed choices regarding their sexual behavior through activities and information on anatomy, pregnancy prevention, and sexually transmitted infections including HIV. The goal of this training is to help you learn how to facilitate **¡Cuídate!** and to enhance yours skills for working with adolescents. 2. Respond appropriately to challenging questions or sensitive situations that may arise during the program.
3. Model proper negotiation skills to support abstinence and condom use, as well as demonstrate correct condom use knowledge.
4. Implement all the components of the six modules of the program.
