

NRTRC "Product Update Forum"

Eceptionist® – A Web Based Solution for Managing the Activities of a Successful Telehealth Program

December 16, 2009 - 12 - 1:30 p.m. PT
Format: Interactive Webinar Discussion
Product: Eceptionist Telehealth Scheduling System

The NRTRC is pleased to invite you to our series of "product update forums" for our members. These sessions are designed to keep you updated on new products and services for the telehealth marketplace.

This is an opportunity to:

- Learn about potential solutions for scheduling and coordinating activities that may be negatively impacting your program
- Discuss successful business use cases developed by the Canadian Health System, U.S. Military Health System (TRICARE), National Health Services (United Kingdom), and other regional and metropolitan networks throughout the world
- Specific services including virtual clinics/appointments, multipoint meetings, store and forward applications, care pathways and protocols

e>ceptionist®

Eceptionist® is an online platform that offers five innovative modules which operate separately or integrate seamlessly to form a powerful scheduling platform to help integrate the continuum of care and serve the needs of healthcare administrators, providers and patients including: TeleHealth Manager, Referral and Triage Manager, Enterprise Scheduling Manager, Waitlist Manager and Organ Case Manager. Eceptionist® is in use worldwide on a daily basis.
