Improving Access to Quality Medical Care

The practice and delivery of healthcare is changing, with an emphasis on improving quality, safety, efficiency, & access to care. Telemedicine can help you achieve these goals! The [University of Arizona Center for Rural Health](#) & the [Southwest Telehealth Resource Center](#) invite you to a **free** webinar on the implementation and practice of telemedicine.

Telehealth Webinar

Wednesday, March 12, 2014 ~ 12:00pm MDT

(11am PDT; 11am Arizona; 12pm MDT; 1pm CDT; 2pm EDT)

“Out of hospital: The telemedicine seat at the Emergency Medical Services table”

This is an opportunity to learn about:

1. Emergency medical services: from 911 to ED admission
2. Potential implementation areas for telemedicine
3. Barriers

*Mike Sotelo,
Director, T-Health
Institute*

Mike Sotelo is the Director of the T-Health Institute located at the University of Arizona College of Medicine Phoenix. He also serves as the Research Data Mining Manager for the Arizona Emergency Medicine Research Center. Mike's current areas of focus are: integrating large disparate data sources to improve protocol for treatment of time sensitive illnesses, developing unique programs to investigate device integration in ambulatory settings, and working with larger national and international entities to improve their emergency medical services. Mike is actively interested in innovative topics that exist within the convergence of: open-source software, data warehousing, open-source electronics, medicine, public health, simulation, cost-saving analysis, and GIS.
